

The World's Most Advanced Technology Available to Solve Your Industrial Ventilating Concerns

OUR MISSION: Gas cleaning, duct cleaners, gas jet specialists, retrofits for pneumatic conveying, special hood design, custom designed dust collectors, retrofitting existing pulse jet dust collector to reduce power use and cut outlet emissions by over 50%, psychometric experts, troubleshooting of ventilation and dust collection systems, spark quenchers, and mist collectors.

Do these sound familiar?

- An irritating powder buildup in your ductwork.
- A fire or explosion hazard in a dust collection system.
- Sagging or noisy ducts.
- An exposure of your workers to breathing potentially harmful dust.
- Worried about more restrictive changing environmental regulations.
- Being ready for tomorrow.
- Do you need assistance in training your workers in designing, operating and maintaining your dust collection systems.
- Design systems and train workers to guard against fires and explosions.
- How many times have you been given the universal excuses like: "it is a static charge that is causing your problems "or perhaps: "You would be better off tearing it out and starting all over again."

Old technology collector retrofitted to new technology and corrected severe moisture compacting dust and freezing in winter.

What QAM can do for YOU:

1. Reduce your operating and maintenance costs. Often modifications can have a payback in months instead of years.
2. Get twice the filter element life even with half as many filter elements (bags or cartridges). Most modifications are within the abilities of your normal maintenance personnel.
3. Quick and professional advice, backed by years of experience.
4. Help you become the lowest cost operations in the world.
5. Bring us your sick and lame systems and we will help you get them running smoothly and efficiently.
6. Eliminate that pesky and irritating problem that someone keeps bringing up.
7. We give the world's best and most cost effective solutions to these industrial ventilation concerns.
8. Your management will appreciate your dramatic results within budget.
9. We are unique in this industry, relying on sound engineering and the latest most advanced technology available anywhere in the world.

Laboratory Testing:

We have access to testing labs that give diagnostic remedies without "house calls". Send us a filter, either failed or in service, and we will perform a complete series of tests to determine cause and remedy of problems.

If we can't fix it, nobody can.

While our competitors offer 2 years experience repeated 50 times over, we offer over 50 years of varied experience of innovation and the evolution of advanced technologies.
